

## Wendy Chang Authors Article on Regulation of Artificial Intelligence in the Legal Profession

In The News | 1 min read Jul 12, 2016 Wendy Chang, a Los Angeles-based partner in the Lawyers for the Profession group at Hinshaw & Culbertson LLP, authored the article "Time to Regulate AI in the Legal Profession? (Perspective)," published by Bloomberg Law on July 12, 2016.

The article discusses the increasing prevalence of Artificial Intelligence (AI) in the legal field over the past year, partly because AI is theoretically able to reach reasoned conclusions that have the potential to outpace the human mind's ability, at a significantly cheaper cost and with increased speed, accuracy and consistency. Ms. Chang discuses that the increased use of AI in the legal field is helpful but should be done with an eye on a lawyer's ethical obligations, due to the potential for mistakes if not correctly used. She questions who will regulate the AI providers and set quality standards, and that the current regulatory void creates commercial uncertainty and a potential for public harm.
